Course Policies and Tentative Syllabus were distributed on August 16. Students were told to begin work on Independent Study Sheets; this work is to provide background for the course and answers do not need to be handed in.

Dr. McKelvy will give the lecture on August 18.

The assignment given below deals with August 20’s lecture and the independent study sheets.

Homework:

p. 43, # 13, 19, 21
p. 47 #80, 81, 88
p. A-8 #23 (Assume uncertainty in base is ±0.03 cm and uncertainty in altitude is ± 0.2 cm. Report the uncertainty in your answer.

The answers for this assignment are due in lecture on Monday, August 23. Show your work to receive credit. Make sure that you have put your name and section number on your paper.
